

Milton CP

MiltonCP (CP stands for Child Proof) is a sterilization disinfectant for baby bottles and bottle nipples. Simply dissolve two tablets of MiltonCP in four liters of drinking water, and immerse the baby bottles and bottle nipples in this solution. For Moms busy with childcare everyday, MiltonCP offers a simple and convenient method for sterilizing baby bottles and bottle nipples to protect babies from infection through suckling.

Child-Proof

MiltonCP employs a childproof sheet to protect babies from accidental ingestion.

The childproof sheet cannot be torn by hand, so cut off the sheet with scissors when using.

Take out the tablet by cutting the sheet with scissors.

How to use MiltonCP

1

Wash the bottles
Wash the baby bottles and bottle nipples with water after use.

2

Prepare the solution
Dissolve two tablets of MiltonCP in four liters of drinking water.

3

Immerse the baby bottles in the solution for sterilization
Immerse the washed baby bottles and bottle nipples completely in the solution for one hour or more.

4

Prepare formula in the bottle
Take the bottle out of the solution and drain off the solution completely. Now ready for use.
*If you are concerned about the residual solution, rinse it out with drinking water.

This tablet is not an oral medicine.

Keep this product out of the baby's reach.

(1) When swallowed by mistake, drink water, raw egg, or milk immediately, and seek medical advice, showing the package of this product.

(2) Do not put the MiltonCP solution into eyes. If it gets into eyes by mistake, wash the eyes with running water or warmed water thoroughly without rubbing eyes. In the case of serious conditions, consult an ophthalmologist, showing the package of this product.

(3) When the symptoms such as roughness in hands, rash, redness, and itching emerge after contact with the MiltonCP solution, stop the use immediately, and consult with a doctor or pharmacist, showing the package of this product.

Precautions for Instructions

(1) Follow these instructions strictly.

(2) Do not use metallic containers for immersing baby bottles. Avoid immersing any other metallic items, such as tongs for baby bottles and spoons; precious metals such as rings; and melamine tableware in the MiltonCP solution.

(3) If the color of the MiltonCP solution changed after preparation, discard the solution, and do not use the water for preparing MiltonCP solution afterward.

Precautions for storage and handling

(1) Store in a cool, dry place avoiding direct sunlight.

(2) Do not repack the tablets in other containers, which may induce misuse or deterioration in quality.

(3) Fading and changing in color may develop in clothes after contact with the MiltonCP solution.

(4) Changing in color or quality may develop in printed items or material itself after immersing in the MiltonCP solution.
